IMPORTANT SAFETY INSTRUCTIONS

CAUTION: PLEASE READ AND OBSERVE ALL WARNINGS AND INSTRUCTIONS IN THIS OWNER'S MANUAL. AND THOSE MARKED ON THE PRODUCT. RETAIN THIS MANUAL FOR FUTURE REFERENCE.

This product has been designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated in this product will protect you if you observe the following procedures for installation, use, and servicing.
This product does not contain any parts that can be repaired by the user.

DO NOT REMOVE THE CABINET COVER, OR YOU MAY BE EXPOSED TO DANGEROUS VOLTAGE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL ONLY.

1. **Read these instructions. -** All these safety and operating instructions should be read before the product is operated.

2. **Keep these instructions. -** The safety, operating and use instructions should be retained for future reference.

3. **Heed all warnings. -** All warnings on the product and in the operating instructions should be adhered to.

4. **Follow all instructions. -** All operating and use instructions should be followed.

5. **Do not use this product near water. –** For example: near a bath tub, wash bowl, kitchen sink, laundry tub, in a wet basement; or near a swimming pool; and other areas located near water.

6. **Clean only with dry cloth. –** Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners.

7. **Do not block any ventilation openings. Install in accordance with the manufacturer's instructions. -** Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from over- heating. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

8. **Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.**

9. **Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.**

DVD Recorder Overview

Recordable Discs

DVD-RW (Digital Video Disc - ReWritable):
These Discs can be recorded on repeatedly.
Recordings can be erased, then you can
record again on the same Disc.

DVD-R (Digital Video Disc - Recordable):
These Discs can be recorded only once.
After you finalize a DVD-R, you cannot
record on it or edit it.

DVD+RW (Digital Video Disc + ReWritable):
These Discs can be recorded on repeatedly.
Recordings can be erased, then you can record
again on the same Disc.

DVD+R (Digital Video Disc + Recordable):
These Discs can be recorded only once.
After you finalize a DVD+R, you cannot
record on it or edit it any more.

Notes
– This Recorder cannot record CD-R or CD-RW discs.
– DVD-R/RW, DVD+R/RW and CD-R/RW discs record-
  ed using a personal computer or a DVD or CD
  Recorder may not play if the disc is damaged or dirty,
  or if there is dirt or condensation on the Recorder's
  lens.
– If you record a disc using a personal computer, even
  if it is recorded in a compatible format, there are
  cases in which it may not play because of the settings
  of the application software used to create the disc.
  (Check with the software publisher for more detailed
  information.)

Playable Discs

	DVD (8 cm/12 cm disc)
	Video CD (VCD) (8 cm / 12 cm disc)
	Audio CD (8 cm/12 cm disc)

In addition, this unit can play DVD-R/DVD-RW discs;
DVD+R/DVD+RW discs; CD-R/CD-RW discs that
contain audio titles, MP3 files, or JPEG files; SVCD;
and kodak picture CDs.

Notes
– Depending on the conditions of the recording equip-
  ment or the CD-R/RW (or DVD±R/±RW) disc itself,
  some CD-R/RW (or DVD±R/±RW) discs cannot be
  played on the unit.
– Do not attach any seal or label to either side (the
  labeled side or the recorded side) of a disc.
– Do not use irregularly shaped CDs (e.g., heart-shaped
  or octagonal). Doing so may result in malfunctions.

Regional code of the DVD Recorder and DVDs
This DVD Recorder is designed and manufac-
tured for playback of Region 1 encoded DVD
software. The region code on the labels of some DVD
discs indicates which type of DVD Recorder can play
those discs. This unit can play only DVD discs labeled 1
or ALL. If you try to play any other discs, the message
"Incorrect region code. Can't play back" will appear on
the TV screen. Some DVD discs may not have a region
code label even though their playback is prohibited by
area limits.

Notes on DVDs and Video CDs
Some playback operations of DVDs and Video CDs
may be intentionally fixed by software manufacturers.
As this unit plays DVDs and Video CDs according to
disc content designed by the software manufacturer,
some playback features of the unit may not be available
or other functions may be added.
Refer also to the instructions supplied with the DVDs
and Video CDs. Some DVDs made for business pur-
poses may not be played on the unit.

Disc-related terms

Title (DVD only)
The main film content, accompanying feature content, or music album.
Each title is assigned a title reference number enabling you to locate it easily.

Chapter (DVD only)
Sections of a picture or a musical piece that are smaller than titles. A title is composed of one or several chapters. Each chapter is assigned a chapter number to enable you to locate the chapter you want. Depending on the disc, chapters may not be labeled.

Track (Video CD and Audio CD only)
Sections of a picture or a musical piece on a Video CD or an Audio CD. Each track is assigned a track number, enabling you to locate the track you want.

Scene
On a Video CD with PBC (Playback control) functions, moving pictures and still pictures are divided into sections called "Scenes". Each scene available is displayed on the Scene menu and assigned a scene number, enabling you to locate the scene you want.
A scene may be composed of one or several tracks.

Types of Video CDs

There are two types of Video CDs:

Video CDs equipped with PBC (Version 2.0)
PBC (Playback control) functions allow you to interact with the system via menus, search functions, or other typical computer-like operations. Moreover, high resolution still pictures can be played if they are included on the disc.

Video CDs not equipped with PBC (Version 1.1)
Operated in the same way as audio CDs, these discs allow playback of video pictures as well as sound, but they are not equipped with PBC.

About Symbols

About the ⊘ symbol display

" ⊘ " may appear on the TV screen during operation. This icon means the function explained in this owner's manual is not available on that specific disc, or at that time.

About the disc symbols for instructions

A section whose title has one of the following symbols are applicable only to those discs represented by the symbol.

Many functions provided on this Recorder are dependent on the recording mode. One or more of the symbols (**Video** , **VR** , **+R** , **+RW**) appear by each function (explained in this manual) so that you can see at a glance whether it's applicable to the disc loaded.

INTRODUCTION

About DVD-R and DVD-RW discs

How are DVD-R and DVD-RW discs different?
The essential difference between DVD-R and DVD-RW is that DVD-R is a record-once medium, while DVD-RW is a re-recordable/erasable medium. You can re-record/ erase a DVD-RW disc approximately 1,000 times.

Can I play my recordable discs in a regular DVD player?
Generally, DVD-R discs and DVD-RW discs recorded in Video mode are playable in a regular DVD player, but they must be 'finalized' first. This process fixes the contents of the disc to make them readable to other DVD players as DVD-Video discs.
DVD-RW discs recorded in VR (Video Recording) mode are playable in some players.

RW
COMPATIBLE This indicates a product feature that is capable of playing DVD-RW discs recorded with Video Recording format.

What are 'recording modes'?

There are two recording modes available using this Recorder: VR mode and Video mode. When recording to a DVD-R disc, recordings are always in Video mode. DVD-RW discs can be formatted for VR mode recording or Video mode recording.

VR mode recording
• 4 different picture quality/recording time settings available (HQ, SQ, LQ, EQ)
• Not playable on regular DVD players
• Recordings can be extensively edited
• Total number of titles on the disc should be less than 99.

Video mode recording
• 4 different picture quality/recording time settings available (HQ, SQ, LQ, EQ)
• Playable on regular DVD players (after finalization)
• Limited editing features
• Total number of titles on the disc should be less than 99.

N ote
DVD-Video Format (Video mode) is a new format for recording on DVD-R/RW and DVD+R/RW discs that was approved by the DVD Forum in 2000. You may therefore experience problems playing recordable DVD discs in some players. Symptoms include video artifacts, audio and/or video dropouts and playback suddenly stopping.
Our company cannot take responsibility for problems playing discs recorded on this Recorder in other players.

Is editing a DVD like editing a video tape?

No. When you edit a video tape you need one video deck to play the original tape and another to record the edits. With DVD, you edit by making a 'Playlist' of what to play and when to play it. On playback, the Recorder plays the disc according to the Playlist.

About word 'Original' and 'Playlist'

Throughout this manual, you will often see the words Original and Playlist to refer to the actual content and the edited version.
• **Original:** content refers to what's actually recorded on the disc.
• **Playlist:** content refers to the edited version of the disc — how the Original content is to be played.

About DVD+R and DVD+RW discs

How are DVD+R and DVD+RW discs different?
The essential difference between DVD+R and DVD+RW is that DVD+R is a record-once medium, while DVD+RW is a re-recordable/erasable medium. You can re-record/ erase a DVD+RW disc approximately 1,000 times.

DVD+RW mode recording
• 4 different picture quality/recording time settings available (HQ, SQ, LQ, EQ)
• Playable on regular DVD players (finalization)
• The edited contents is playable on regular DVD players only after finalizing
• Recordings can be edited the title/chapter
• Total number of titles on the disc should be less than 99.

DVD+R mode recording
• 4 different picture quality/recording time settings available (HQ, SQ, LQ, EQ)
• Playable on regular DVD players (after finalization)
• Any edited contents are not be compatible on regular DVD players. (Hide, chapter combine, added chapter mark, etc.)
• Limited title/chapter editing features
• Total number of titles on the disc should be less than 99.

About DVD recording

$\mathcal{N}$**otes**
- This Recorder cannot make recordings on CD-R or CD-RW discs.
- Our company takes no responsibility for recording failure due to power outages, defective discs, or damage to the Recorder.
- Fingerprints and small scratches on a disc can affect playback and/or recording performance. Please take proper care of your discs.

Disc types and recording formats, modes, and settings

This Recorder can play five different kinds of DVD discs: pre-recorded DVD-Video discs, DVD-RW, DVD-R, DVD+RW and DVD+R discs. The disc format for DVD-R discs is always "Video format"—the same as pre-recorded DVD-Video discs. This means that once finalized, you can play a DVD-R in a regular DVD player.

By default, the DVD-RW disc format is Video Recording (VR) format, though you can change this to Video format, if required. (Reinitializing the disc will erase the contents of the disc.)

The recording mode is closely related to the disc format. If the disc format is Video Recording format, then the recording mode is VR mode; if the disc format is Video mode, then the recording mode is Video mode (except for DVD-Video, which is not recordable, and so does not have a recording mode).

Within the recording modes (which are fixed for them whole disc) are the record settings. These can be changed as required for each recording and determine the picture quality and how much space the recording will take up on the disc.

Notes for recording

- The recording times shown are not exact because the Recorder uses variable bit-rate video compression. This means that the exact recording time will depend on the material being recorded.
- When recording a TV broadcast, if the reception is poor or the picture contains interference, the recording times may be shorter.
- If you record still pictures or audio only, the recording time may be longer.
- The displayed times for recording and time remaining may not always add up to exactly the length of the disc.
- The recording time available may decrease if you heavily edit a disc.
- If using a DVD-RW disc, make sure you change the recording format (Video mode or VR mode) before you record anything on the disc. See page 27 (Disc Format) for how to do this.
- When using a DVD-R disc, you can keep recording until the disc is full, or until you finalize the disc. Before you start a recording session, check the amount of recording time left on the disc.
- When using a DVD-RW disc in Video mode, recording time available will only increase if you erase the last title recorded on the disc.
- The Erase Title option in the Title List-Original menu only hides the title, it does not actually erase the title from the disc and increase the recording time available (except for the last recorded title on a DVD-RW disc in Video mode).
- Overwrite recording is available using DVD+RW discs.

Restrictions on video recording

- You cannot record copy-protected video using this Recorder. Copy-protected video includes DVD-Video discs and some satellite broadcasts. If copy-protected material is encountered during a recording, recording will pause or stop automatically and an error message will be displayed on-screen.
- Video that is 'copy-once only' can only be recorded using a DVD-RW disc in VR mode with CPRM (see below).

What is 'CPRM'?

CPRM is a copy protection system (with scramble system) only allowing the recording of 'copy once' broadcast programs. CPRM stands for Content Protection for Recordable Media.
This Recorder is CPRM compatible, which means that you can record copy-once broadcast programs, but you cannot then make a copy of those recordings. CPRM recordings can only be made on DVD-RW discs formatted in VR mode, and CPRM recordings can only be played on players that are specifically compatible with CPRM.

Copyright

- Recording equipment should be used only for lawful copying and you are advised to check carefully what is lawful copying in the area in which you are making a copy. Copying of copyright material such as films or music is unlawful unless permitted by a legal exception or consented to by the rights owner.
- This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only, unless otherwise authorized by Macrovision corporation. Reverse engineering or disassembly is prohibited.

Remote Control Operation Range

Point the Remote Control at the remote sensor and press the buttons.

Remote Control Battery Installation
Remove the battery cover on the rear of the Remote Control, and insert two R03 (size AAA) batteries with ⊕ and ⊖ matched correctly.

⚠ **Caution**
Do not mix old and new batteries. Never mix different types of batteries (standard, alkaline, etc.).

Resetting the DVD Recorder

If you observe any of the following symptoms...

- The unit is plugged in, but the power will not turn on or off.
- The front panel display is not working.
- The DVD Recorder is not operating normally.

...you can reset the DVD Recorder as follows:

- Press and hold the POWER button for at least five seconds. This will force the unit to power off.
  Press the POWER button again to turn the unit back on.
- Unplug the power cord, wait at least five seconds, and then plug it in again.

Precautions

Handling the unit

When shipping the unit
The original shipping carton and packing materials come in handy. For maximum protection, re-pack the unit as it was originally packaged at the factory.

When setting up the unit
The picture and sound of a nearby TV, VCR, or radio may be distorted during playback. In this case, position the unit away from the TV, VCR, or radio, or turn off the unit after removing the disc.

To keep the surface clean
Do not use volatile liquids, such as insecticide spray, near the unit. Do not leave rubber or plastic products in contact with the unit for a long period of time. They will leave marks on the surface.

Cleaning the unit

To clean the cabinet
Use a soft, dry cloth. If the surfaces are extremely dirty, use a soft cloth lightly moistened with a mild detergent solution. Do not use strong solvents such as alcohol, benzine, or thinner, as these might damage the surface of the unit.

To obtain a clear picture
The DVD Recorder is a high-tech, precision device. If the optical pick-up lens and disc drive parts are dirty or worn, the picture quality will be poor.
Regular inspection and maintenance are recommended after every 1,000 hours of use. (This depends on the operating environment.)
For details, please contact your nearest dealer.

Notes on Discs

Handling discs

Do not touch the playback side of the disc. Hold the disc by the edges so that fingerprints will not get on the surface. Do not stick paper or tape on the disc.

Storing discs

After playing, store the disc in its case.
Do not expose the disc to direct sunlight or sources of heat, or leave it in a parked car exposed to direct sunlight, as there may be a considerable temperature increase inside the car.

Cleaning discs

Fingerprints and dust on the disc can cause poor picture quality and sound distortion. Before playing, clean the disc with a clean cloth. Wipe the disc from the center outward.
Do not use strong solvents such as alcohol, benzine, thinner, commercially available cleaners, or anti-static spray intended for older vinyl records.

Connections

Connecting Antenna/Cable TV to DVD Recorder

1 Disconnect the antenna leads from the rear of the TV.

2 Identify the type of cable from your antenna. If it is a round cable as illustrated, it is a 75 ohm coaxial antenna cable. This cable will connect directly to the jack marked ANT.IN on your DVD Recorder.

𝒯ip

If your antenna lead wire is a flat type antenna cable, connect it to an Antenna Adapter (300-ohm to 75-ohm) (not supplied) and slip the Adapter onto the ANT.IN jack. The Adapter does not screw on to the DVD Recorder, it just slips over the jack.

Rear of DVD Recorder
Cable Service Without Cable Box

If your cable wire is connected to your TV without a converter or descrambler box, unscrew the wire from your TV and attach it to the ANT.IN jack on the DVD Recorder. Use the supplied round coaxial cable to connect between the DVD Recorder's RF.OUT jack and the 75 ohm antenna input jack on the TV. With this connection, you can receive all midband, super band, and hyperband channels. (All cable channels.)

Cable Service With Cable Box

If a converter is required in your cable system, follow the instructions below:
The cable hookup permits both TV and DVD Recorder operation.

To view or record a CATV channel
1. Tune the TV to the correct video input channel.
2. Set the DVD Recorder channel selector to the output channel of the Cable Converter box using CH (▲ / ▼) or number (0-9) of your DVD Recorder. (Example: CH3)
3. Select the channel to view at the Cable Converter Box.

𝒩ote

If you are using a cable box to tune channels, it is not necessary to do EZ Channel Scan as indicated on page 20.

Rear of DVD Recorder
Connections (Continued)

𝒯ips

- Depending on your TV and other equipment you wish to connect, there are various ways you could connect the Recorder. Use only one of the connections described below.
- Please refer to the manuals of your TV, VCR, Stereo System or other devices as necessary to make the best connections.
- For better sound reproduction, connect the Recorder's AUDIO OUT jacks to the audio in jacks on your Amplifier, Receiver, Stereo, or audio/video equipment. See "Connecting to an Amplifier" on page 18.

⚠Caution

– Make sure the DVD Recorder is connected directly to the TV. Tune the TV to the correct video input channel.
– Do not connect the DVD Recorder's AUDIO OUT jack to the phono in jack (record deck) of your audio system.
– Do not connect your DVD Recorder via your VCR. The DVD image could be distorted by the copy protection system.

TV Connections

- Make one of the following connections, depending on the capabilities of your existing equipment.

RF coaxial connection

Connect the RF.OUT jack from the DVD Recorder to the antenna in jack on the TV using the 75-ohm Coaxial Cable supplied **(R)**. The RF.OUT jack passes the signal through from the ANT IN jack.

Video connection

1 Connect the VIDEO OUT jack from the DVD Recorder to the video in jack on the TV using the video cable **(V)**.

2 Connect the Left and Right AUDIO OUT jacks from the DVD Recorder to the audio left/right in jacks from the TV using the audio cables **(A)**.

S-Video connection

1 Connect the S-VIDEO OUT jack from the DVD Recorder to the S-Video in jack on the TV using the S-Video cable **(S)**.

2 Connect the Left and Right AUDIO OUT jacks from the DVD Recorder to the audio left/right in jacks on the TV using the audio cables **(A)**.

Component Video (Color Stream®) connection

1 Connect the COMPONENT VIDEO OUT jacks from the DVD Recorder to the corresponding in jacks on the TV using an Y Pb Pr cable **(C)**.

2 Connect the Left and Right AUDIO OUT jacks from the DVD Recorder to the audio left/right in jacks on the TV using the audio cables **(A)**.

Progressive Scan (ColorStream® pro) connection

- If your television is a high-definition or "digital ready" television, you may take advantage of the DVD Recorder's progressive scan output for the highest video resolution possible.
- If your TV does not accept the Progressive Scan format, the picture will appear scrambled if you try Progressive Scan on the DVD Recorder.

1 Connect the COMPONENT VIDEO OUT jacks from the DVD Recorder to the corresponding in jacks on the TV using an optional Y Pb Pr cable **(C)**.

2 Connect the Left and Right AUDIO OUT jacks from the DVD Recorder to the audio left/right in jacks on the TV using the supplied audio cables **(A)**.

𝒩otes

– Set Progressive Scan option to "ON" in the Setup menu, see page 22.
– Progressive scan does not work with the analog video connection (yellow VIDEO OUT & S-Video jacks).

Amplifier Connections

Connecting to an Amplifier equipped with two channel analog stereo or Dolby Pro Logic II/ Pro Logic™

Connect the Left and Right AUDIO OUT jacks from the DVD Recorder to the audio left and right in jacks on your Amplifier, Receiver, or Stereo System, using the audio cables **(A)**.

Connecting to an Amplifier equipped with two channel digital stereo (PCM) or to an Audio/ Video Receiver equipped with a multi-channel decoder (Dolby Digital™, MPEG 2, or DTS)

1 Connect one of the DVD Recorder's DIGITAL AUDIO OUT jacks [OPTICAL (**O**) or COAXIAL (**X**)] to the corresponding in jack on your Amplifier. Use an optional digital (optical **O** or coaxial **X**) audio cable.

2 You will need to activate the Recorder's digital output. (See "Audio" on page 24).

🎵 Digital Multi-channel sound

A digital multi-channel connection provides the best sound quality. For this you need a multi-channel Audio/Video Receiver that supports one or more of the audio formats supported by your DVD Recorder (MPEG 2, Dolby Digital and DTS). Check the receiver manual and the logos on the front of the Receiver.

⚠ Caution:

Due to the DTS Licensing agreement, the digital output will be in DTS digital out when DTS audio stream is selected.

🅝 otes

– If the audio format of the digital output does not match the capabilities of your Receiver, the Receiver will produce a strong, distorted sound or no sound at all.
– Six Channel Digital Surround Sound via digital connection can only be obtained if your Receiver is equipped with a Digital Multi-channel decoder.
– To see the audio format of the current DVD in the on-screen display, press AUDIO.
– This Recorder does not perform internal (2 channel) decoding of a DTS sound track. To enjoy DTS multi channel surround, you must connect this Recorder to a DTS compatible Receiver via one of this Recorder's digital audio outputs.

Menu Operation

In this menu system, there are several ways to customize the settings provided. Most menus consist of three levels to set up the options, but some require greater depth for the variety of settings. If you press SETUP, only the first and second level of the menu system will appear on the TV screen. The third level can be displayed by pressing ▶. For navigating the menu levels, you will see "▶" on the right side of the menu label to help you go to the next level.

To bring up and exit the Menu:
Press SETUP to bring up the menu. A second press of SETUP will take you back to initial screen.

To go to the next level:

Rating

Movies on DVDs may contain scenes not suitable for children. Therefore, discs may contain Parental Control information that applies to the complete disc or to certain scenes on the disc. These scenes are rated from Level 1 to 8, and alternatively, more suitable scenes are available for selection on some discs. Ratings are country-dependent. The Parental Control feature allows you to prevent discs from being played by your children or to have certain discs played with alternate scenes.
1 **Follow steps 1-3 as shown above to the left (Set Password).**

2 **Use ▲ / ▼ to select the Rating option.**

3 **Press ► to move to the third level.**

4 **Follow step 6 as shown above to the left (Set Password).**

5 **Select a rating from 1 to 8 using the ▲ / ▼ buttons. One (1) has the least playback restrictions. Eight (8) has the most playback restrictions.**
No Limit: If you select No Limit, Parental Control is not active. The disc will play in full.
Level 1 to 8: Some discs contain scenes not suitable for children. If you set a rating for the Recorder, all disc scenes with the same rating or lower will be played. Higher rated scenes will not be played unless an alternate scene is available on the disc. The alternate scene must have the same rating or a lower one. If no suitable alternate scene is found, playback will stop. You must enter the 4-digit password or change the rating level in order to play the disc.

6 **Press ENTER to confirm your rating selection, then press SETUP to exit the menu.**

Notes on MP3 Recordings

About MP3

● An MP3 file is audio data compressed by using the MPEG1 audio layer-3 file-coding scheme. We call files that have the ".mp3" file extension "MP3 files".

● The Recorder can not read an MP3 file that has a file extension other than ".mp3".

MP3 Disc compatibility with this Recorder is limited as follows:

1. CD-R physical format should be "ISO 9660" and "JOLIET".

2. If you record MP3 files using the software which cannot create a FILE SYSTEM, for example "Direct-CD" etc., it is impossible to playback MP3 files. We recommend that you use "Easy-CD Creator", which creates an ISO9660 or JOLIET file system.

3. Total number of files and folders on the disc should be less than 999.

This DVD Recorder requires discs/recordings to meet certain technical standards in order to achieve optimal playback quality. Pre-recorded DVDs are automatically set to these standards. There are many different types of recordable disc formats (including CD-R containing MP3 files) that require certain pre-existing conditions (see above) to insure compatible playback.

Customers should also note that permission is required in order to download MP3 files and music from the Internet. Our company has no right to grant such permission. Permission should always be sought from the copyright owner.

Notes on JPEG Files
- Depending on the size and number of JPEG files, it may take several minutes for the Recorder to read a disc's content. If you don't see an On-Screen Display after several minutes, some of the files are too big — reduce the resolution of the JPEG files to less than 4 mega pixels and burn another disc.
- The total number of files and folders are not restricted but the total number of files on the folder should be less than 999.
- Some discs may be incompatible due to different recording formats or the condition of the discs.
- If you are using software such as "Easy CD Creator" to burn JPEG files on a CD-R, ensure that all select-ed files have the ".jpg" or ".jpeg" extension before copying them into the CD layout.
- If the files have ".jpe" extensions, please rename them as ".jpg" or ".jpeg" files.
- File names without the ".jpg" or ".jpeg" extension cannot be read by this Recorder, even though the files are shown as JPEG image files in Windows Explorer®.

Basic Recording from TV channels

Follow the instructions below to record a TV program. Recording starts immediately and continues until the disc is full or you stop the recording.

1 Switch on the Recorder and load a recordable disc.
Also make sure that the TV's input source is set to this Recorder. If you load a completely blank disc, the Recorder takes a short while to initialize the disc.

2 Set a recording mode as necessary by pressing REC MODE repeatedly. (HQ, SQ, LQ, EQ)
Recordable time:
HQ (High Quality); Approx. 1 hour
SQ (Standard Quality); Approx. 2 hours
LQ (Low Quality); Approx. 4 hours
EQ (Extended Quality); Approx. 6 hours

3 Use ▲ / ▼ buttons to select the TV channel to record.

ⓣ Changing TV Audio Channel
You can select the audio channel (language) to listen to by pressing AUDIO while viewing a TV program (Stereo, SAP, Mono). The current audio channel is displayed on-screen.
• If the sound is of poor quality when set to Stereo, you may often improve it by changing to Mono.

4 Press REC (●) once.
Recording will start. (The REC indicator lights in the display window.)
● Recording continues until you press STOP (■) or the disc is full.

- Use ▲ / ▼ to select a program you want to remove on the Timer Recorder List. If you want to remove the program, press CLEAR.

Stopping a Timer Recording in Progress

After a timer recording has started, you can still cancel the program.
- Press POWER.

Timer Recording Troubleshooting

Even though the timer is set, the Recorder will not record when:
- There is no disc loaded.
- A non-recordable disc is loaded.
- Disc Protect is set to ON in the Setup menu (see page 27).
- Power is turned on.
- There are already 99 titles recorded on the disc.

You cannot enter program for a timer recording if:
- A recording is already underway.
- The time you're trying to set has already passed.
- There are already 8 timer programs set.

If two or more timer programs overlap:
- The earlier program takes priority.
- After the earlier program finishes, the later program starts.
- If two programs are set to start at exactly the same time, the program entered first takes priority.

If the disc is damaged, the recording may not be completed successfully. In this case even though the Check field shows "Rec. OK", it may not be.

Recording from an External Input Source

Recording from External Components

Recording from a Digital Camcorder

You can record from a digital camcorder connected to the DV IN port on the front panel of this Recorder.
Using the Recorder's remote, you can control both the Camcorder and this Recorder.
Before recording, make sure that the audio input for the DV IN port is set up (see page 27).

𝒯ips
- The source signal must be DVC-SD format.
- Some camcorders cannot be controlled using this Recorder's remote.
- If you connect a second DVD Recorder using a DV cable, you cannot control the second DVD from this one.
- You can't control this unit remotely from a component connected to the DV IN port.
- You can't record date and time information from a DV cassette.

1 **Make sure your Digital Camcorder is connected to the front panel DV IN port. See page 19.**

2 **Check that the DV audio input is as you require.**
You can choose between Audio 1 (original audio) and Audio 2 ((over-dubbed audio).
- DV Input is set from the DV Rec Audio in sub-menu of the Setup menu. See DV Rec Audio on page 27 for more information.

3 **Press INPUT repeatedly to select the DV input.**
DV appears in the display window and on the TV screen.

4 **Find the place on the Camcorder tape that you want to the recording to start from.**
For best results, pause playback at the point from which you want to record.
- Depending on your Camcorder, you can use this Recorder's remote to control the Camcorder using the STOP, PLAY and PAUSE functions.

5 **Press REC (●) once to start recording.**

- Recording is automatically stopped if the Recorder detects no signal.
- You can pause or stop the recording by pressing PAUSE/STEP (❙❙) or STOP (■). You cannot control the Camcorder from this Remote Control during recording.
- In Video mode, the final frame of the recording may remain displayed on screen for a while after recording stops.
- For timer recording to work properly on this Recorder, the Digital Camcorder must also be switched on and be operating.

What is DV?

Using DV, also known as i.LINK, you can connect a DV-equipped Camcorder to this Recorder using a single DV cable for input and output of audio, video, data and control signals.
The i.LINK interface is also known as IEEE 1394-1995. "i.LINK" and the "i.LINK" logo are trademarks.

- This Recorder is only compatible with DV-format (DVC-SD) camcorders. **Digital Satellite Tuners, PCs, and D-VHS Video Recorders are not compatible.**
- You cannot connect more than one DV camcorder at a time to this Recorder.
- You cannot control this Recorder from external equipment connected via the DV IN port (including two DVD Recorders).
- It may not be possible to always control the connected Camcorder via the DV IN port.
- Digital Camcorders can usually record audio as stereo 16-bit/48kHz, or twin stereo tracks of 12-bit/32kHz. This Recorder can only record one stereo audio track. Set DV Rec Audio to Audio 1 or Audio 2 as required (see page 27).
- Audio input to the DV IN port should be 32 or 48kHz (not 44.1kHz).
- Picture disturbance on the recording may occur if the source component pauses playback or plays an unrecorded section of tape, or if the power fails in the source component, or the DV cable becomes disconnected.
- Although DV Rec Audio is set to Audio 2 and Audio 2 signal is not present, DV Rec Audio will be reset to Audio 1 automatically.

DV-Related Messages

You may see the following messages appear on your TV screen when using the DV IN port.

Not connected to Camcorder
The Camcorder is not connected properly, or the Camcorder is switched off.

Too many devices connected
The DV IN port on this Recorder supports connection to just one Camcorder.

Check the tape
There is no cassette loaded into the connected equipment.

Troubleshooting

If you can't get a picture and/or audio through the DV IN port, check the bullet points:
- Make sure the DV cable is properly connected.
- Try switching off the connected equipment then switching back on.
- Try switching the audio input.

N **ote**
Depending on the connected Camcorder, you may not be able to control it using the Remote Control supplied with this Recorder.

Title and Chapter Editing

Edits you make to the Original content change the actual content of the disc. For example, if you delete a title or chapter from the Original content (Title or Chapter), that title or chapter is deleted from the disc, freeing up extra recording time.

When you edit the Playlist, on the other hand, you are not changing the content of the disc. For example, when you delete a title from the Playlist, you are just telling the Recorder not to play that title; nothing is actually deleted from the disc.

Titles, Chapters, and Parts VR

Titles in the disc's original content contain one or more chapters. When you insert a title into the Playlist, all the chapters within that title also appear. In other words, chapters in the Playlist behave exactly as chapters on a DVD-Video disc do. Parts are sections of Original or Playlist titles. From the Original and Playlist menu, you can add or delete parts. Adding a chapter or title to the Playlist creates a new title made up of a section (ie., chapter) of an Original title. Deleting a part removes part of a title from the Original or Playlist menu.

⚠️ **Caution**

• When editing using the Delete, Add, or Move functions, the start and end frames may not be exactly as set in the starting and ending points display.
• During Playlist playback, you may notice a momentary pause between edits. This is not a malfunction.

Adding Chapter Markers

VR   +RW   +R   ▯▯ Chapter

You can put a chapter marker anywhere in a Playlist or Original title during recording or playback.
Once the chapter is marked, you can use the Chapter Search feature, as well as delete, combine and move chapters in the Chapter List-Original or Chapter List-Playlist menu.
You can insert up to 999 chapter markers in both the Original and Playlist contents.

𝒩 **ote**

Chapter markers are inserted at regular intervals automatically. You can change this interval from the Initial Setup menu (see Auto Chapter on page 27).

1 **Play the title (Original or Playlist).**

2 **At the point you want to start a new chapter, press CHP ADD.**
A chapter marker icon appears on the TV screen.
• You can also put chapter markers in while recording.

Changing Title Thumbnails

VR   +RW   +R   ▯ Thumbnail

Each title displayed in the Title List menu is represented by a thumbnail picture taken from the start of that title or chapter.
If you prefer, select a different still picture from within a title.

1 **Play the title (Original or Playlist).**

2 **Press THUMBNAIL to make the currently displayed picture the one that appears in the Original or Playlist menu.**
The still picture that you choose appears in both the Original or Playlist menu.

𝒯 **ip**

You can also change the thumbnail picture of the title on the Chapter List-Original or Chapter List-Playlist menu. Select a chapter on the Chapter List-Original or Chapter List-Playlist menu, then press THUMBNAIL. The thumbnail picture of the title that includes the chapter is changed.

Making a New Playlist `VR`

Use this function to add an Original title or chapter to the Playlist. When you do this, the whole title is put into the Playlist (you can delete bits you don't need later — see Deleting an Original or Playlist title/chapter on page 52).

The title appears in the Playlist complete with the chapter markers that appeared on the Original. However, if you add more chapter markers to the Original later, these are not automatically copied over into the Playlist title.

You can add up to 999 chapters to one disc . If you only want to add a chapter of a title, use the Adding a title/chapter to the Playlist on this page.

1 **Press MENU/LIST repeatedly to display Title List-Original menu.**
If you want to display the Chapter List-Original menu, refer to "Using the Chapter List-Original menu" on page 44.

2 **Choose a title or chapter on the Original menu to put into the Playlist, then press ENTER.**
Original (Title or Chapter) options appear on the left side of the Original menu.

Deleting a Title/Chapter

VR **+RW** **+R**

If you erase a title or chapter from the Playlist menu on DVD-RW discs formatted in VR mode, you only remove it from the Playlist; the title/chapter remains in the Original menu.

If you choose to delete a title or chapter from Title List or Chapter List menu, the title or chapter is actually deleted from the disc and the remaining time available for recording increases. Titles/chapters deleted from the Original are also removed from the Playlist.

𝒩ote
It may not be possible to delete chapters that are less than 5 seconds long.

1 **On the Title List or Chapter List menu, use ▲ ▼ ◄ ► to choose a chapter or title you want to delete then press ENTER.**
Options appears on the left side of the screen.

Playing Your Recordings on Other DVD Players (Finalizing a Disc)

Most regular DVD players can play finalized discs recorded in Video mode, finalized DVD+R or DVD+RWs. A small number of players can also play DVD-RW discs recorded in VR mode, finalized or not. Check the manual that came with the other player to check what formats of discs it will play.

Finalizing 'saves' the recordings and editings in place so that the disc can be played on a regular DVD player or computer equipped with a suitable DVD-ROM drive. Finalizing a Video mode disc creates a menu screen for navigating the disc. The menu can be accessed by pressing MENU/LIST or TITLE.
To finalize a disc, refer to "Finalize" on page 28.

Notes
- Unfinalized DVD+RW is playable on regular DVD players.
- The edited contents of a DVD+RW disc is compatible on regular DVD players only after finalization.
- Any edited contents of the DVD+R disc are not compatible on regular DVD players. (Hide, chapter combine, added chapter mark, etc.)

- Depending on your TV, some or all buttons may not function on the TV, even after entering the correct manufacturer code.
- If you enter a new code number, the code number previously entered will be erased.
- After you replace the batteries in the remote, the code number you have set may be reset to the default setting. Re-enter the appropriate code number again.

Troubleshooting

Check the following guide for the possible cause of a problem before contacting service.

Symptom	Cause	Solution
No power.	• The power cord is disconnected.	• Plug the power cord into the wall outlet securely.
No picture.	• The TV is not set to receive DVD Recorder signal output.	• Select the appropriate video input mode on the TV so the picture from the DVD Recorder appears on the TV screen.
	• The video cable is not connected securely.	• Connect the video cable securely.
	• The connected TV power is turned off.	• Turn on the TV.
No sound.	• The equipment connected with the audio cable(s) is not set to receive DVD Recorder signal output.	• Select the correct input mode on the Audio Receiver so you can listen to the sound from the DVD Recorder.
	• The audio cables are not connected securely.	• Connect the audio cable securely.
	• The power of the equipment connected with the audio cable is turned off.	• Turn on the equipment connected with the audio cable.
	• The audio connecting cord is damaged.	• Replace it with new one.
The playback picture is poor.	• The disc is dirty.	• Clean the disc.
The DVD Recorder does not start playback.	• No disc is inserted.	• Insert a disc. (Check that the disc indicator in the display window is lit.)
	• An unplayable disc is inserted.	• Insert a playable disc. (Check the disc type, color system, and regional code.)
	• The disc is placed upside down.	• Place the disc with the playback side down.
	• The disc is not placed within the guide.	• Place the disc on the disc tray correctly inside the guide.
	• The disc is dirty.	• Clean the disc.
	• The Rating level is set.	• Cancel the Rating function or change the rating level.
The picture from the external input is distorted	• The video signal from the external component is copy-protected.	• You cannot connect via this Recorder. Connect the component directly to your TV.
Some channels are skipped over when using ▲ / ▼.	• Those channels are not stored in the Recorder.	• Restore channels. See "To Add or Erase Channels from Memory" on page 21.
The picture or sound of broadcasting channel is weak or missing.	• Antenna or cables are loose.	• Tighten connections or replace cable.
Camcorder image is not shown.	• Camcorder is off.	• Turn camcorder on and operate properly.

Troubleshooting (Continued)

Symptom	Cause	Solution
Can't play a disc recorded using this Recorder on another player.	• The disc was recorded in Video mode.	• Finalize the disc. (page 28)
	• Some players will not play even a finalized disc recorded in Video mode.	• No solution.
	• The disc was recorded in VR mode,	• The other player must be RW compatible in order to play it.
	• Discs recorded with copy-once material cannot be played on other players.	• No solution.
Cannot record or did not record successfully.	• The remaining blank space on the disc is insufficient.	• Use another disc.
	• The source you are trying to record is copy protected.	• You cannot record the source.
	• When setting the recording channel, the channel is tuned on the TV's own tuner.	• Select the channel on the Recorder's built-in TV tuner.
	• When recording to a Video mode disc, programs that are copy-once protected cannot be recorded.	• Use a VR mode formatted disc for copy-once material.
Timer recording is not possible.	• Clock in DVD Recorder is not set to correct time.	• Set clock to correct time. See "Auto Clock Set" or "Manual Clock Set" on pages 21- 22.
	• Timer has been programmed incorrectly.	• Reprogram Timer. See "Timer Recording" on page 41.
	• Timer record indicator light does not appear after programming timer.	• Reprogram Timer.
